

UTE INDIAN WATER COMPACT

1980

BUDGET SESSION

Enrolled Copy

S. B. No. 64

By Glade M. Sowards

AN ACT RELATING TO THE RELATIONSHIP BETWEEN THE UTE INDIAN TRIBE OF THE UNTAH AND OURAY RESERVATION AND THE STATE AND ITS POLITICAL SUBDIVISIONS; PROVIDING THE AUTHORIZATION FOR THE STATE TO ENTER INTO THE PROPOSED UTE INDIAN WATER COMPACT WITH THE TRIBE AND THE UNITED STATES; AND PRESCRIBING THE TERMS OF THIS COMPACT.

Be it enacted by the Legislature of the State of Utah:

Section 1. The within Compact, the Ute Indian Water Compact, providing for the execution by the State of Utah, the Ute Indian Tribe of the Uintah and Ouray Reservations, Utah, and the United States of America, through their various representatives, is hereby authorized, confirmed, and approved for the State of Utah.

Section 2. The text of the Ute Indian Water Compact is as follows:

UTE INDIAN WATER COMPACT

The State of Utah, the Ute Indian Tribe of the Uintah and Ouray Reservation, Utah, and the United States of America, acting through their respective representatives agree to a Ute Indian Water Compact as follows:

ARTICLE I

Purpose of Compact

The purpose of this Compact is to remove the causes of present and future controversy over the quantification, distribution, and use of all waters claimed by or through the Ute Indian Tribe.

ARTICLE II

Legal Basis for Compact

This Compact is made in accordance with the Constitution and Laws of the United States, the State of Utah, and the Ute Indian Tribe.

ARTICLE III

Water

There is hereby apportioned, confirmed, and recognized from the waters apportioned to the State of Utah from the Colorado River System to the United States of America in perpetuity, in trust, for the Ute Indian Tribe and others, the depletion of water in the amount of 248,943 acre-feet per annum, and the related gross diversion requirement of 471,035 acre-feet per annum, from all sources in accordance with and as more fully set out in the "Tabulation of Ute Indian Water Rights" attached hereto and on file with the Utah State Engineer. The priority date of October 3, 1861, is recognized for land groups 1 through 5, except for water supplied from storage in the Central Utah Project, and the priority date of January 5, 1882, is recognized for land groups 6 and 7, unless indicated otherwise in the Tabulation. Tables 1, 2, and 3 of the Tabulation list the total irrigable acreage, maximum allowable depletions and diversion requirements, respectively, for each of the land groups by stream. No water rights held in trust can be transferred from the lands listed in said groups without approval of the Secretary of the Interior. All water delivered to groups 1 and 5 lands from storage under the Central Utah Project shall be assigned the priority date of the Water and Power Resources Service filing to accomplish the equitable allocation of water to all subscribers of the Project.

In addition to the water allocated under the previous paragraph, there is hereby apportioned, confirmed, and recognized to the United States of America in perpetuity, in

S. B. No. 64

trust, for the Ute Indian Tribe the depletion of 10,000 acre-feet of water annually having a priority date of October 3, 1861, for municipal and industrial purposes, which shall be diverted from the Green River. To the extent that the Tribe or its members use reserved water for domestic, municipal, industrial, or related uses, the quantity so used shall be included within said 10,000 acre-feet unless a transfer of water from land listed in the Tabulation is properly made.

No water allocated pursuant to this Compact shall be subject to loss or forfeiture under the laws of the State of Utah or otherwise. Further, the water allocated herein shall not be restricted to any particular use, but may be used for any purpose selected by the Tribe in accordance with the procedures provided for in this agreement.

The quantities of water apportioned hereby include all water rights of every nature and description derived from the reserved water rights doctrine, from all sources of water, both surface and underground, and includes all types and kinds of uses, whether municipal, industrial, recreational, in-stream uses, sale, lease, or any other use whatsoever, and encompasses all claims asserted by or through the Ute Indian Tribe, and all persons and entities other than the Tribe whose claims or rights are derived, directly or indirectly, from the reserved water rights of the Tribe. Thus, any water rights adjudicated or otherwise established in the future on behalf of any person or entity and based upon a claim, directly or indirectly, through any reserved water rights of the Tribe shall be included within and as a part of the water quantified by this Compact. Any state water rights acquired by the Tribe for land to which a reserved right is recognized herein shall be forfeited.

Included within the practicably irrigable acreages recognized are (1) tribal lands and individual Indian

S. B. No. 64

allotments; (2) Uintah Indian Irrigation Project lands, which include tribal lands, allotments, and some private lands which were originally allotted lands; and (3) some few lands distributed to former tribal members terminated in accordance with the Ute Partition Act, approved August 27, 1954 (P.L. 83-671, 68 Stat. 868, 25 U.S.C. §§667-667aa). Nothing in this Compact shall enlarge or diminish the scope of or otherwise affect either the United States' trust responsibility or the Ute Indian Tribe's responsibility to those persons who have been designated as mixed-bloods under the Act of August 27, 1954 (68 Stat. 868). The total acreage under irrigation or susceptible to sustained production of agricultural crops by means of irrigation is recognized as 129,201 acres, reduced by 7% to 120,157 acres to reflect roads, yards, fences, rights-of-way, and other non-productive lands. All lands in the Uintah Indian Irrigation Project are designated assessible or non-assessible. The Secretary of the Interior is authorized to change the designation from one to the other.

Nothing contained herein shall be construed to preclude the United States as Trustee for the Ute Indian Tribe, the Ute Indian Tribe, or any of its members from filing application with the Utah State Engineer for the appropriation of additional water under the laws of the State of Utah.

The diversion and depletion requirements for the water rights apportioned under this Compact are set forth in Tables 1, 2, and 3 of the Tabulation, consisting of acreage, diversion, and depletion schedules. The delivery schedules set forth in Tables 4, 5, 6, and 7 of the Tabulation shall determine the distribution of the water allocated hereunder. The Utah State Engineer, in a manner consistent with the agreements and covenants contained herein, shall have general administrative supervision of all surface and ground waters apportioned to the United States in trust for the Ute Indian

S. B. No. 64

Tribe and others, including measurement, apportionment, and distribution thereof, to the points of diversion from the main sources. The United States and the Tribe shall have general administrative supervision of all water apportioned to the United States, including measurement, apportionment, and distribution thereof, within the canal distribution systems from the various points of river diversion.

The United States on behalf of the Tribe, or the Tribe shall comply with the provisions of Section 73-3-3, Utah Code Annotated 1953, with regard to any change in the point of diversion, place, or nature of use; except that neither the United States nor the Tribe need make application to the State Engineer for change of place of use when the new place of use is within the same canal system.

The parties agree to use their best efforts in the expeditious planning and development of water projects for all group 5 lands, or substitute lands, including the Uintah and Upalco Units, the Leland Bench Project, or other similar projects of the Central Utah Project.

This Article is not intended to relieve the responsibility of the parties involved in the Midview Exchange Agreement and the Agreement dated the 20th day of September, 1965, among the United States of America, the Ute Indian Tribe of the Uintah and Ouray Reservation, and the Central Utah Water Conservancy District. The provisions of said Agreement of September 20, 1965, shall remain binding upon the parties thereto and continue in full force and effect.

ARTICLE IV

Enforcement

For purposes of compelling compliance with the terms of this Compact, each party waives the defense of sovereign immunity as to actions brought by any other party, including any defense under the Eleventh Amendment to the United States

S. B. No. 64

Constitution. The United States District Court for the District of Utah is hereby granted jurisdiction to adjudicate any claim made by a party to this Compact that any other party, or its officials, are acting to impair or violate any right or privilege in this Compact.

ARTICLE V

Ratification and Amendment

Each party acknowledges that in order for this Compact to constitute a final and permanent settlement of tribal reserved water rights, this Compact must be ratified by the United States, the State of Utah, and the Ute Indian Tribe through referendum of the Tribe's membership. The parties shall use their best efforts to have the ratifications undertaken as expeditiously as possible. The parties hereto agree that the terms of this Compact have the force and effect of law and agree to adopt all statutes, regulations and ordinances that are, or may be, necessary to harmonize existing statutes, regulations and ordinances with this Compact, and agree that this Compact may be included within any general stream adjudication. The Secretary of the Interior is authorized to implement this Compact by appropriate regulations.

PURPOSE

This Tabulation of Ute Indian Water Rights is prepared pursuant to and in accordance with the Ute Indian Water Compact between the Ute Indian Tribe of the Uintah and Ouray Indian Reservation, Utah, the State of Utah and the United States of America concerning the water rights of the Ute Indian Tribe. The purpose of this Tabulation is to fully identify and define all federal reserved water rights of the Ute Indian Tribe.

FORWARD

In December, 1960 the Ute Tribe submitted to the Utah State Engineer a report entitled Water Right Claims, Uintah and Ouray Indian Reservation, Utah, prepared by E. L. Decker, tribal engineer, and commonly referred to as the Decker Report. This report was prepared to identify both the Tribe's present irrigated acreage and also those lands that are susceptible to irrigation, for which a water right was claimed under the doctrine expressed in Winters v. United States, 207, U.S. 564 (1908). The acreages listed in the Decker report, as amended, were used as a basis for this Tabulation.

The Decker Report divided the lands into seven different groups for identification purposes, which are incorporated herein:

Group (1): Lands included within the Uintah Indian Irrigation Project, the water right to which has been certificated by the State of Utah and included within Federal Court Decrees adjudicating water rights of the Lakefork, Yellowstone, Uinta and Whiterock Rivers.

Group (2): Lands included in the Uintah Indian Irrigation Project, the water right to which has been certificated by the State of Utah, served from the Duchesne River, including the townsites of Duchesne, Randlett and Myton.

Group (3): Lands that are or can be served from the Duchesne River through the facilities of the Uintah Indian Irrigation Project which have not been certificated by the State of Utah.

Group (4): Lands which have been found to be productive and economically feasible to irrigate from privately constructed ditch systems on the Duchesne River or its tributaries above the Pahcease Canal.

Group (5): Lands which have been found to be susceptible to irrigation and are proposed to be developed within the Central Utah Project.

Group (6): Lands lying east of the Green River served from the White River for which Applications to Appropriate water were once filed with the State of Utah.

Group (7): Lands lying east of the Green River which have been found to be productive and economically feasible to irrigate from privately constructed ditch systems now in operation or to be constructed along the Green River, White River, Willow Creek, Bitter Creek, Sweet Water Creek and Hill Creek.

A summary of the Ute Indian Tribe's total irrigable acreage, maximum allowable depletion and diversion requirement for each of the land groups, by stream, are contained in tables 1, 2 and 3, respectively.

Delivery schedules specifying the quantity of water to be diverted from the various streams are shown in tables 4 through 7. The quantity of water to be diverted into the various canals and/or ditches shall be determined based on the irrigable acreage as shown in the acreage tabulation, times the flow rate per acre corresponding to the period of time on the appropriate delivery schedule. No delivery of water shall be made to lands until the lands are developed or appropriate change application filed.

For the group 1 lands the diversion requirement is 3.40 acre-feet per acre, of which 3.00 acre-feet per acre is to be supplied from direct streamflow in accordance with the appropriate delivery schedule and the remaining 0.40 acre-feet per acre is to be supplied from storage under the proposed Uintah and Upalco Uints of the Central Utah Project. Such water delivered from storage shall assume the priority date of the Water and

Power Resources Service (Bureau of Reclamation) water right to accomplish the equitable allocation of water to all subscribers of the projects.

Within the group 1 lands there are 9,300 acres commonly referred to as the Midview Exchange lands. As a result of this exchange these lands are now served from the Duchesne River and thus have a diversion requirement of 4.0 acre-feet per acre. Water for these lands shall be supplied in accordance with terms of the Midview Exchange Agreement.

The priority date of the group 1 through 5 lands is October 3, 1861, except for water supplied from storage in the Central Utah Project. All water delivered to groups 1 and 5 lands from storage in the Central Utah Project shall be assigned the priority date of the Water and Power Resources Service (Bureau of Reclamation) filing to accomplish the equitable allocation of water to all subscribers of the Project. The priority date for those group 5 lands to be transferred to Leland Bench and supplied from the Green River shall be October 3, 1861. The priority date of the group 6 and 7 lands is January 5, 1882, except those group 7 lands bearing the notation "to be determined" under the Priority Date column in the Tabulation. As to those certain group 7 lands the priority date shall be determined by mutual agreement, among the parties to the Compact on or before August 1, 1980, or thereafter by binding arbitration using the following guidelines:

1. All matters are deemed resolved herein except the issue of the priority date for certain parcels of group 7 lands. That issue shall be submitted to an arbitrator who shall have the authority under Utah Revised Code Sections 78-31-1, et seq., to decide the unresolved factual issue as to the precise priority date for any parcel of group 7 lands specified in the Tabulation.

2. To reach a determination of the priority date, either the State of Utah or the Ute Tribe may request a panel of five water law experts. With the State of Utah striking first, the Ute Tribe and the State shall alternately strike names from the list until one name remains and such person shall be the arbitrator.

3. The decision of the arbitrator shall be final and shall conclusively determine the priority date in question.

4. The procedures of the American Arbitration Association shall govern any proceedings and the costs and expenses of the arbitrator shall be shared equally by the State and the Ute Tribe.

The acreage tabulations herein lists the land group, source of supply, canal or ditch (if applicable), point of diversion, irrigable acreage and place of use. The quantity of land to be irrigated is limited to the acreage listed in the Irrigable Acreage Column and shall be located within the area described in the Place of Use Column.

MUNICIPAL AND INDUSTRIAL WATER

In addition to the quantities of water set forth herein for the irrigable acreage of the Ute Indian Tribe, the United States of America in trust for the Ute Indian Tribe is allocated the depletion of 10,000 acre-feet of water annually for municipal, industrial and related purposes. To the extent that the tribe or its members use reserved water for domestic, municipal, industrial or related uses, the quantity so used shall be included within said 10,000 acre feet unless a transfer of water from land listed in the tabulation is properly made. The priority date for the water provided under this paragraph is October 3, 1861.
